

ENVIRONMENTAL PROTECTION

Air Compliance and Enforcement

Proposed Readoption with Amendments: N.J.A.C. 7:27A

Authorized by: Bradley M. Campbell, Commissioner,
Department of Environmental Protection.

Authority: N.J.S.A. 13:1D-1 et seq.; 13:1B-3; 13:1D-125 to 133 et
seq.; 26:2C-1 et seq., particularly 26:2C-8 and 26:2C-19

Please Note: All comments prior to the formal rule proposal should be brought to the stakeholder meeting.

Summary

As the Department has provided a 60-day comment period on this notice of proposal, this notice is excepted from the rulemaking calendar requirement pursuant to N.J.A.C. 1:30-3.3(a)5.

Pursuant to Executive Order No. 66 (1978), N.J.A.C. 7:27A expires on November 9, 2004. These rules govern air pollution control and prohibition in New Jersey. As required by the Executive Order, the Department has reviewed N.J.A.C. 7:27A and determined that it continues to be necessary, reasonable and proper for the purposes it was originally promulgated to serve. The Department is proposing to amend its Air Administrative Procedures and Penalties Rules found at N.J.A.C. 7:27A-3.1 et seq. to identify violations of the Air Program Rules as either minor or non-minor for the purpose of providing grace periods in accordance with P.L. 1995, c. 296 (N.J.S.A. 13:1D-125 et seq.), “Fast Track Compliance Law,” commonly called the Grace Period Law. The proposed amended rules set forth how the Department will respond to any violation identified as minor. The Department also proposes to readopt N.J.A.C. 7:27A with amendments to N.J.A.C. 7:27A-3.10 that will correct omissions and inaccuracies in cross references. The readoption of N.J.A.C. 7:27A is necessary to ensure continued enforcement of the New Jersey Air Pollution Control Act, N.J.S.A. 26:2C-1 et seq., and the Federal Clean Air Act, 42 U.S.C. 7401 et seq.

The following describes the substantive provisions of each section in N.J.A.C. 7:27A that the Department proposes to readopt.

Section Summary

N.J.A.C. 7:27A-1 and 2 are reserved. N.J.A.C. 7:27A-3 contains procedural rules for the

assessment, payment, and appeal of civil administrative penalties, as well as rule setting forth the penalties for specific air pollution violations.

N.J.A.C. 7:27A-3.1 describes the scope and purpose of subchapter 3. N.J.A.C. 7:27A-3.2 defines terms used throughout the subchapter. N.J.A.C. 7:27A-3.3 describes the Department's process for assessing penalties for violations of the Air Pollution Control Act, and identifies when payment of a penalty is due.

N.J.A.C. 7:27A-3.4 sets forth the procedures for requesting and conducting an adjudicatory hearing to contest an administrative order and/or a notice of civil administrative penalty assessment.

N.J.A.C. 7:27A-3.5 identifies in general terms how the Department determines civil administrative penalties for air pollution violations and sets forth the range and limit of such penalties. The section also sets forth the factors that the Department may consider in determining the penalties for air pollution violations.

N.J.A.C. 7:27A-3.6 establishes civil administrative penalties for submitting inaccurate or false information in any application, registration, record or other document that is required to be maintained or submitted under the air program rules.

N.J.A.C. 7:27A-3.7 establishes civil administrative penalties for failure to allow lawful entry and inspection. N.J.A.C. 7:27A-3.8 establishes civil administrative penalties for failure to pay a fee when due.

N.J.A.C. 7:27A-3.9 establishes civil administrative penalties for the failure to submit or the failure to maintain records of any smoke, emission or stack data, or any test data, or any other record or information required by the Department.

N.J.A.C. 7:27A-3.10 establishes civil administrative penalties for violations of rules adopted under the New Jersey Air Pollution Control Act, N.J.S.A. 26:C-1 et seq. (the Act), identifies, by

subchapter and provision of N.J.A.C. 7:27, the civil administrative penalty amount that the Department may assess for each offense, and, as proposed to be amended, the grace period, if any, that will apply to each violation. Penalty amounts depend on the frequency of the offense; in some cases, the amount of actual emissions; the percent exceedance of the allowable emissions; the type of source; and the nature of the air contaminant emitted. N.J.A.C. 7:27A-3.10 also establishes the Department's authority to revoke a violator's variance or certificate to operate. The Department's proposed amendments to N.J.A.C. 7:27A-3.10 are discussed below.

N.J.A.C. 7:27A-3.11 establishes the maximum civil administrative penalties for failure to notify the Department of releases of air contaminants in violation of N.J.S.A. 26:2C-19(e).

N.J.A.C. 7:27A-3.12 provides that the Department may assess a penalty equal to the economic benefit that the violator has realized as a result of not complying with or by delaying compliance with the requirements of the Act, or any rule, administrative order, operating certificate or permit issued thereunder. This economic benefit penalty assessment may be levied in addition to the civil administrative penalty levied for the violation, subject to specified limits.

Proposed Amendments

On December 22, 1995, the Legislature enacted the Grace Period Law, N.J.S.A. 13:1D-125 et seq., which requires the establishment of procedures to ensure the consistent application of grace (compliance) periods for minor violations of certain environmental statutes. Pursuant to that law, the Department is required to designate, through rulemaking, certain types of violations of rules contained in sixteen environmental statutes as minor or non-minor violations. Under the Grace Period Law, any person responsible for a minor violation is afforded a period of time by the Department to correct the violation. This period of time is known as a grace period. If the

minor violation is corrected as required, then the Department will not assess a penalty. In those cases where a violation is not corrected within the grace period, the Department may pursue enforcement action in accordance with its statutory authority including, but not limited to, the assessment of penalties as may be appropriate within the exercise of the Department's traditional, judicially recognized enforcement discretion.

The law does not affect the Department's enforcement authority, including the exercise of enforcement discretion to treat a violation as minor. In those situations where a violation is labeled as minor in these new rules, but in fact the specific violation as it occurred does not fulfill all the statutory requirements for a minor violation (N.J.S.A. 13:1D – 129(b)), the Department reserves its discretion to treat the violation as non-minor.

In designating, through rulemaking, types or categories of violations as minor, the Department must apply the criteria set forth in the law at N.J.S.A. 13:1D-129(b). These criteria are as follows:

- (1) The violation is not the result of the purposeful, knowing, reckless or criminally negligent conduct of the person responsible for the violation;
- (2) The violation poses minimal risk to the public health, safety and natural resources;
- (3) The violation does not materially and substantially undermine or impair the goals of the regulatory program;
- (4) The activity or condition constituting the violation has existed for less than 12 months prior to the date of discovery by the Department;

(5) (a) The person responsible for the violation has not been identified in a previous enforcement action by the Department or a local governmental agencies responsible for a violation of the same requirement of the same permit within the preceding 12 month period;

(b) In the case of a violation that does not involve a permit, the person, responsible for the violation has not been identified in a previous enforcement action by the Department or a local governmental agencies as responsible for the same or a substantially similar violation at the same facility within the preceding 12 month period; or

(c) In the case of any violation, the person responsible for the violation has not been identified by the Department or a local agency as responsible for the same or substantially similar violations at any time that reasonably indicate a pattern of illegal conduct and not isolated incidents on the part of the person responsible; and

(6) The activity or condition constituting the violation is capable of being corrected and compliance achieved within the period of time prescribed by the Department. (See N.J.S.A. 13:1D-129(b))

The Grace Period Law also requires the Department to establish the length of the correction period, which may be no less than 30 days or more than 90 days, based upon the nature and extent of the minor violation and a reasonable estimate of the time necessary to achieve compliance. The Department may establish a special class of minor violations that, for public health and safety reasons, must be corrected within a period of less than 30 days.

The additional statutory criteria identified above as (1), (4) and (5), regarding respectively, the intent of the violator, the duration of the violation and whether it is a repeat

offense can be applied only on a case by case basis. Thus, each violation listed at N.J.A.C. 7:27A that is identified as minor will be eligible for a grace period only if it meets these additional three criteria.

The Air Program is among the programs to which the Grace Period Law applies. In order to obtain assistance in the development of these regulations, the Department initiated an informal process to discuss and receive input from interested parties. As part of this process, it developed a discussion document setting forth a proposed list of minor and non-minor violations for the Air Program and conducted a series of workshops to provide an opportunity for interested parties to discuss the proposed list and provide comments and raise issues. The Department conducted workshops on November 22, 1996, and April 23, 1997, to discuss the application of the Grace Period Law to the Air Program. Several Years later, the Department prepared draft discussion document that included a draft of the proposed changes to N.J.A.C. 7:27A-3.1, Air Administrative Procedures and Penalties, and provided it to interested parties. Stakeholder meetings were held on April 21 and 28, 2004, to provide an additional opportunity for interested parties to discuss the proposed changes and provide comments and raise issues. These proposed amended rules, which identify minor and non-minor violations of N.J.A.C 7:27, which govern the Air Program, and provides the terms and conditions by which a grace period shall be afforded, reflect the Department's consideration of the input obtained at those workshops and stakeholder meetings.

The Air Pollution Control rules at N.J.A.C. 7:27 and 27A were adopted to establish standards and requirements for the control and prohibition of air pollution within the state of New Jersey. Activities addressed by these rules include emission limitations or equipment

requirements for limiting emissions, and methods for determining compliance with those limitations, permit and others fees charged by the Department, civil administrative penalty assessments and other enforcement actions.

Assisted by stakeholder input, the Department is hereupon proposing to readopt these rules with the amendments that it anticipates will improve air quality in all communities.

7:27A-3.2 Definitions

The Department is proposing to add a definition of "grace period" which is a new term. A grace period is the period of time during which a person can achieve compliance with a minor violation where the Department will not impose a penalty for that violation in accordance with N.J.S.A. 13:1D-125 et seq., commonly known as the Grace Period Law, and as further set forth in section N.J.A.C 7:27A-3.10(q).

N.J.A.C 7:27A-3.9(c)1, 2, & 3

The Department is proposing to amend N.J.A.C. 7:27A-3.9(c) to incorporate a grace period. Existing N.J.A.C. 7:27A-3.9(c) includes penalty assessments for failure to maintain records and failure to submit records pertaining to smoke, opacity, or emission data, or stack test data, or any other records required by the Act, or any rule promulgated, or any administrative order, permit, license or other operating authority issued, pursuant to the Act. For records that are required by rule or by a permit, where the penalty matrix includes the specific citation of the

violation, the penalty matrix at N.J.A.C. 7:27A-3.10 rather than N.J.A.C. 7:27A-3.9 will be used for penalty determination. If the failure to maintain records is the result of failure to comply with any administrative order, or is other than a violation of a specific provision of N.J.A.C. 7:27, N.J.A.C. 7:27A-3.9 will apply.

The underlying rules for the penalty matrix, N.J.A.C. 7:27, or a permit issued pursuant to the underlying rules, usually require a facility to keep its records in a particular format, and to make its records readily available to the Department. Non-submittal of records is purely an administrative requirement, therefore it is appropriate under the grace period law for the Department to allow a grace period for non-submittal of records. Where a facility fails to maintain records as required by N.J.A.C. 7:27 or a permit issued under the Act, the facility will have, as part of its production, purchase, and inventory records, adequate data to generate the required records within 30 days. In such a case, the violation to maintain the records would be primarily administrative in nature, therefore it is appropriate under the grace period law for the Department to allow a grace period for maintaining of records.

However, in some cases, the facility has no data, or insufficient data available and is unable to produce the records required. Without records, the facility is unable to demonstrate compliance with the underlying rule for which the records were required. In such a case, the facility may have had emission-related violations during the time period that the required records would have covered; however, the Department cannot determine whether or not there were emissions violations because the records are not available. This fails to meet one of the statutory requirements for being a minor violation, specifically the requirement of N.J.S.A. 13:1D-129b(3), that the violation does not materially and substantially undermine or impair the goals of the regulatory program. Therefore,

if the person responsible for maintaining records or submitting records has been allowed a grace period, but fails to produce and submit the records for the time period that the required records would have covered within the allowed grace period, the Department or a local government agency may, in accordance with the provisions of the Act or this chapter, impose a penalty that is retroactive to the date the violation was first occurred.

N.J.A.C 7:27A-3.10 Civil administrative penalties for violation of rules adopted pursuant to the Act

In preparing the proposed lists of minor and non-minor violations, the Department used the Air Program's existing regulations as a starting point. Violations are set forth in tables at N.J.A.C. 7:27A-3.10(m) and (n). The existing tables contain penalty matrices setting forth the citation, a summary describing the violation and penalties for first, second, third, fourth and each subsequent offense. The proposed rules add an additional column entitled "Grace Period (days)" to the penalty matrices, which column represents the number of days, if any, the Department will allow a regulated entity to correct a violation. A "30" in the new column indicates that the violation could be a minor one, depending on whether the criteria of the Grace Period Law are met. A "0" indicates that the citation is always a non-minor violation, for which no grace period is provided. If a violation could be considered either a minor or non-minor violation, even before taking into account the criteria at N.J.S.A. 13:1D-129b(1), (4) and (5), the Department has placed "<*>" in the grace period column. Proposed new N.J.A.C. 7:27A-3.10(q)8 provides for up to 60 days extension of the compliance date, up to a maximum grace period of 90 days, as provided in N.J.S.A. 13:1D-125b.

The Department has taken into consideration the requirements of N.J.S.A. 13:1D-129b(2), (3), and (6) in determining whether a violation of each citation listed in the penalty

Draft Date: 08/09/04

matrix could be considered a minor violation. The Department must also use the criteria of N.J.S.A. 13:1D-129b(1), (4) and (5) to determine what will be considered a minor violation. If the Department has determined that a violation is eligible for a grace period, and if these criteria of N.J.S.A. 13:1D-129b(1), (4) and (5) are met, the violation will be considered minor and be allowed a grace period. Proposed new N.J.A.C 7:27A-3.10(q)⁴ recites the additional statutory criteria of N.J.S.A. 13:1D-129b(1), (4) and (5).

In applying the statutory criteria to the penalty matrix, the Department intends to distinguish between a violation that is purely administrative, including the maintenance of records (provided the records can be produced within the grace period), and a violation that may result in an emission increase and, therefore, be potentially detrimental to the environment.

The grace period column will include one of three different designations, depending on whether a grace period is appropriate, not appropriate, or cannot be determined except on a review of the specific facts surrounding the violation. If the Department has determined that a grace period is appropriate, then the column will show “30.” A violation of the specific provision in the penalty matrix would receive a grace period, unless the criteria of N.J.S.A. 13:1D-129b(1), (4) or (5) require otherwise. The Department has determined that these violations are purely administrative in nature and, if compliance is achieved within the grace period, should have no detrimental impact on the environment.

If the Department has determined that a grace period is never appropriate for a specific violation, then the grace period column will reflect “0.” A grace period is not appropriate for any violation that results in an emission increase, a release of a contaminant not listed in a permit, a release of an air contaminant above a permit allowable or a statutory limit in any State or Federal regulation, or was a result of a malfunction of a piece of equipment or control device

that may have resulted in an emission increase. The air quality in New Jersey is designated as “severe” non-attainment for ozone by the EPA. Volatile organic compounds and nitrogen oxides are precursors of ozone. New Jersey is also a state with a high population density, and with many sources of air pollutants, including toxic air pollutants. Any increase in any air contaminant is potentially detrimental to the air quality of New Jersey may “materially and substantially undermine or impair the goals of the regulatory program” or pose more than “minimal risk to the public health, safety and natural resources.” Therefore, violations that may have resulted in an emission increase will be considered non-minor violations and no grace period will be offered.

If it is not possible for the Department to determine in advance of a violation whether a grace period would be appropriate, then the grace period column will indicate “<*>.” For this last type of violation, the Department will apply the statutory criteria to the specific facts of the violation on a case by case basis. For any violation that results in an emission increase, a release of a contaminant not listed in a permit, a release of an air contaminant above a permit allowable or a statutory limit in any State or Federal regulation, or was a result of a malfunction of a piece of equipment or control device that may have resulted in an emission increase, or where the criteria set forth in the law at N.J.S.A. 13:1D-129b are not satisfied, the violation will be considered a non-minor violation and will not be allowed a grace period. For any violation that is purely administrative in nature and did not result in an emission increase, a release of a contaminant not listed in a permit, a release of an air contaminant above a permit allowable or a statutory limit in any State or Federal regulation, or was not a result of a malfunction of a piece of equipment or control device that may have resulted in an emission increase, or was a violation

of a Federal requirement for which a penalty is required, the violation will be considered a minor violation.

The Department is proposing to add a new subsection q to existing N.J.A.C. 7:27A-3.10. Proposed new N.J.A.C. 7:27A-3.10(q)1 through 3 discusses the three types of grace period provided in the penalty matrix. New N.J.A.C. 7:27A-3.10(q)4 identifies the general criteria for minor violations under N.J.S.A. 13:1D-129 of the grace period law. The criteria are discussed above. New N.J.A.C. 7:27A-3.10(q)5 requires the Department of local government agency that issues a notice of violation issued under proposed amended N.J.A.C. 7:27A to notify the person responsible for the violation of the nature of the violation, the statutory or other provision violated, and the length of the grace period. The notice is necessary in order that the person responsible may take advantage of the time that the grace period law provides.

If the person responsible demonstrates that he or she has corrected the violation within the appropriate grace period, then new N.J.A.C. 7:27A-3.10(q)6 provides that no penalty will be assessed for the violation. Moreover, the violation will not be considered an “offence” for purposes of the penalty matrix, which increases the applicable fine based upon the number of previous offenses (violations of the same provision) the responsible person has committed.

The Department proposes new N.J.A.C. 7:27A-3.10(q)7 in order that it can verify that that the person responsible for a minor violation has taken appropriate measures to achieve compliance within the grace period. The responsible person must submit, in writing and certified in accordance with N.J.A.C. 7:27-1.39, information detailing the corrective action taken or compliance achieved. The Department may perform an investigation to determine that the information submitted is accurate and that compliance has been achieved. In lieu of an investigation, the Department may accept the information submitted as adequate for

demonstrating compliance and take no further action.

Under proposed new N.J.A.C. 7:27A-3.10(q)8, if a person responsible for a minor violation requires more than 30 days to achieve compliance, the Department or local government agency issuing the notice of violation may extend the grace period for an additional 60 days, for a maximum grace period of 90 days. In order to obtain the extension, the person responsible for a violation must request the extension in writing explaining why additional time is needed, certified in accordance with N.J.A.C. 7:27-1.39, to the Department or the local government agency prior to the expiration of the initial 30 day grace period. The Department may, at its discretion, issue a written extension to the time period specified in the notice of violation, but no more than 60 additional days extension may be granted, bringing the total grace period to the statutory maximum of 90 days.

If the person responsible for the violation fails to demonstrate to the Department or a local government agency that compliance has been achieved within the period of time specified in the notice of violation, then proposed new N.J.A.C. 7:27A-3.10(q)9 allows the Department or a local government agency to impose a penalty retroactive to the date the notice of violation was first issued.

Administrative Errors

There are several administrative errors that have been identified in the existing N.J.A.C. 7:27A-3.10(m) penalty matrix. As the rules in N.J.A.C. 7:27 were amended, the corresponding provisions of the penalty matrix at N.J.A.C. 7:27A-3.10(m) should also have been amended. The Department proposes to correct citation errors in the penalty matrix. The Department proposes to change the following citations to correct the cross reference to the underlying rules: N.J.A.C. Draft Date: 08/09/04

7:27-8.4(f)1, 8.4(f)3, 8.4(f)4, 8.4(f)5, 8.4(f)6, 8.4(n), 16.3(d), 16.3(i)1, 16.3(i)2, 16.3(i)3, 16.3(l), 16.3(o)1, 16.3(o)2, 16.3(o)3, 16.3(p), 16.17(c).

The Department proposes to re-order the following citations to match the order of the underlying rules: N.J.A.C. 7:27-16.3(m), 16.3(n)1, 16.3(n)2.

The Department proposes to correct typographical errors in the following cross references in N.J.A.C. 7:27A-3.10(m): N.J.A.C. 7:27-5.2(a), 22.39(a), 22.14(d),

The following citations are proposed to be deleted from the penalty matrix because they are obsolete: N.J.A.C. 7:27-8.4(f), 16.17(n), 16.25(h), 16.25(l), 25.3(b).

The Department proposes to remove duplicate references to N.J.A.C. 7:27-16.17(b)1 through N.J.A.C. 7:27-16.17(n) which appear after N.J.A.C. 7:27-16.20(a).

New Penalty Provisions

During a recent amendment to N.J.A.C. 7:27-16 (See 34 N.J.R. 2489(a) and 35 N.J.R. 2509(a)), a civil administrative penalty was not included for N.J.A.C. 7:27-16.3(e) or (q). N.J.A.C. 7:27-16.3(e) requires the equipment used for capturing VOC vapors when transferring gasoline into a motor vehicle (commonly known as State II), and all of its components, to be kept in good operating condition. N.J.A.C. 7:27-16.3(q) requires the transfer of gasoline at a gasoline loading facility, into or from a delivery vessel, or at a gasoline dispensing facility, to have a vapor control system.

Failure to comply with N.J.A.C. 7:27-16.3 (e) or (q) would result in excess VOC emissions from the transfer of gasoline. The Department is proposing identical penalties for a violation of N.J.A.C. 7:27-16.3(e) and (q) as existed for these violations prior to the above mentioned recent amendments.

Existing N.J.A.C. 7:27-20 sets forth limitations on the combustion of waste oil. The Department promulgated N.J.A.C. 7:27-20 in 2000; however, it proposed no corresponding changes to N.J.A.C. 7:27-27A. The Department now proposes civil administrative penalties for violations of the subchapter, because used oil combustion causes hazardous air pollution.

Because violations of N.J.A.C. 7:27-20.2 are similar to violations of preconstruction permits, the Department proposes to amend N.J.A.C. 7:27A-3.10(m)20 to include penalties for violations of N.J.A.C. 7:27-20.2 that are comparable to the penalties associated with N.J.A.C. 7:27-8.3(e).

Combustion of waste oil, especially if the waste oil contains hazardous material, may result in emissions that are unhealthy to the public. The hazard is particularly severe if the waste oil is burned in close proximity to people. N.J.A.C. 7:27-20.2(a) prohibits use of waste oil except as allowed by N.J.A.C. 7:27-20. N.J.A.C. 7:27-20.2(e) prohibits use of waste oil in areas near sensitive populations. Accordingly, the Department proposes penalties for violations of N.J.A.C. 7:27-20.2(a) and (e) that are comparable to the penalties associated with N.J.A.C. 7:27-8.3(e), Class 5 for and hazardous air pollutants (or HAPs), and TXS regulated at N.J.A.C. 7:27-17.3.

Due to the possible hazardous nature of waste oil, even if it is combusted in a safe manner even in small amounts, combustion may result in a greater risk than the smallest sources of air pollution regulated by N.J.A.C. 7:27. Therefore, the Department proposes to amend N.J.A.C. 7:27A-3.10(m)20 to include penalties for violations of N.J.A.C. 7:27-20.2(b) that are comparable to N.J.A.C. 7:27-8.3(e), Class 2 which are for permit violations that represent a greater risk than the smallest sources of air pollution regulated by N.J.A.C. 7:27.

Selling waste oil, which the Department regulates at N.J.A.C. 7:27-20.2(c), could involve a much larger volume and effect a much larger population; therefore, the Department is proposing penalties at N.J.A.C. 7:27A-3.10(m)20 that are comparable to N.J.A.C. 7:27-8.3(e), Class 4 which are for permit violations that represent a risk posed by large sources of air pollution regulated by N.J.A.C. 7:27.

N.J.A.C. 7:27-20.2(d) prohibits combustion of waste oil without registration or permit required under N.J.A.C. 7:27-20. This is similar to operating without a permit to construct or certificate to operate; therefore, the Department proposes to amend N.J.A.C. 7:27A-3.10(m)20 to include penalties that parallel violations of N.J.A.C. 7:27-8.3(a) and (b), which prohibit operating equipment without an appropriate permit. Due to the low emissions for equipment requiring a registration, rather than a permit, the Department proposes penalties consistent with Class 1 for N.J.A.C. 7:27-8.3(a) are proposed for waste oil combustion up to 500,000 BTU/hr, and Class 2 for N.J.A.C. 7:27-8.3(a) are proposed for waste oil combustion over 500,000 BTU/hr. Due to the greater possible health risk, no grace period will be allowed for failure to obtain a permit or registration for the equipment.

Social Impact

The Air Pollution Control rules at N.J.A.C. 7:27A, as proposed to be readopted with amendments, will continue to provide the Department with reasonable and necessary standards for the regulation of air pollution, and to provide a positive social impact by outlining specific procedures for regulating air pollution. The readoption will continue to encourage compliance and discourage noncompliance with the State's air pollution control laws and regulations, associated rules, administrative orders, permits, licenses and other operating authorities issued by

Draft Date: 08/09/04

the Department. Failure to readopt these penalty rules would result in a State air pollution control program with no regulatory enforcement mechanism.

The general public health will benefit from the continued improvement in the air quality that will result from compliance by facilities with emission standards and other permit requirements. The readoption will also enable the Department to comply with the Federal Clean Air Act regulations, which require each state to have an air pollution control programs with an adequate enforcement mechanism. Failure to meet minimum Federal requirements will result in costly sanctions, including cessation of Federal highway funding in New Jersey. By continuing to encourage compliance with the Department's air pollution control program, readoption will also enable the Department to meet Federally-mandated emission reduction commitments set forth in the existing New Jersey State Implementation Plan (SIP). Failure to meet the SIP requirements would result in Federal sanctions with significant negative impact on the State.

These proposed readopted regulations, with the proposed amendments and correction of errors and omissions, will continue to allow the Department to address air pollution in a manner that protects public health, safety and welfare

The Department anticipates that the proposed grace period amendments to N.J.A.C. 7:27A-3 will help encourage a greater sense of cooperation between the Department and the regulated community. By removing the threat of penalties for certain types of violations where compliance is achieved within the time specified, the proposed rules will encourage the regulated community to take positive action toward achieving compliance.

Economic Impact

The proposed readoption of N.J.A.C. 7:27A with amendments will have no economic impact on persons who comply with the air pollution control rules. For violators, the economic impact of the proposed readoption with amendments will vary according to the severity of the air pollution exceedance or other violation. Penalty amounts contained in this proposed readoption with amendments are the same as in the existing rules, with the exception of the proposed new penalties for violation of N.J.A.C. 7:27-20, relating to used oil. The proposed penalties for violations of N.J.A.C. 7:27-20 are comparable to violations of similar provisions elsewhere in N.J.A.C. 7:27.

If the Department does not maintain an effective compliance program, the State will not realize the air quality improvements required under the Federal Clean Air Act. Failure to comply with the Federal Clean Air Act could result in Federally-imposed additional regulatory programs to meet air quality standards. Such programs would likely have significant and costly impact on the residents of the State as well as regulated community. Also, as set forth in the Social Impact, above, failure to meet minimum Federal requirements may result in costly sanctions, including some cessation of Federal highway funding in New Jersey. A reduction in Federal highway funding in this State could, in turn, result in a financial impact on the people of New Jersey.

The proposed grace period rules will have little economic impact on the regulated community, inasmuch as the rules formalize the Department's existing policy with regard to allowing an opportunity for correction of minor violations. To the extent that the proposed amended rules formally classify violations as minor for which the Department has not previously provided a grace period, the regulated community will realize an economic benefit. No longer will the facility be subject to immediate penalty, but instead the facility will have between 30 and 90 days to achieve compliance, without being assessed a penalty.

The Department has been collecting approximately three million to five million dollars a year in penalties, while issuing about 200 to 300 notices of violation for grace period under the Department's existing policy. If all of the notices of violation had contained a penalty assessed in accordance with N.J.A.C. 7:27A instead of a grace period, the additional penalties assessed would be approximately \$100,000.

Environmental Impact

The proposed readoption of N.J.A.C. 7:27A with amendments is anticipated to continue the improvement of the air quality in New Jersey by continuing the economic incentive to the regulated community to comply with the Act, and the rules adopted under the Act. The proposed readopted rules have had and will continue to have a positive environmental impact by providing for the regulation of air pollution, and the management of facilities subject to the air pollution regulations. The penalty provisions will continue to provide a deterrent to those who would violate the regulatory requirements. The control of air pollution will protect the environment and the health, welfare, and the property of New Jersey residents.

The proposed grace period provisions would allow a violator an opportunity to correct certain violations within the time provided and thereby avoid a penalty. The Department therefore anticipates that these rules will encourage the regulated community to correct certain types of violations in a timely manner. Prompt correction will reduce the potential risk these minor violations may have created and will, therefore, result in an additional positive environmental impact.

Federal Standards Analysis

P.L. 1995, c.65 and Executive Order No. 27 (1994) require State agencies which adopt, readopt, or amend any rule or regulation, to provide a comparison with Federal law, and to provide further discussion and analysis (including cost-benefit analysis) if the standards or requirements imposed by the agency exceed standards or requirements imposed by Federal law.

Pursuant to the Federal Clean Air Act (CAA), the United States Environmental Protection Agency (USEPA) is authorized to issue administrative orders assessing penalties for violations of state implementation plans approved under the CAA or whenever any person constructs, modifies or operates a major stationary source in an area that is not in compliance with the new source provisions. These penalties can be assessed in an amount up to \$25,000 per day per violation. The total for such penalties is limited to \$200,000 in any particular case unless the USEPA administrator and Attorney General jointly determine that a total penalty amount of greater than \$200,000 or a period of violation greater than one year is appropriate.

Pursuant to the provisions (42 U.S.C. §7410) of the CAA, each state is required, within three years after the promulgation or revision of a national primary or secondary ambient air

standard, to develop a state implementation plan (SIP) which provides for the implementation, maintenance and enforcement of such standards in each quality control region. The purpose of the SIP is to have the states bring the noncompliant area into compliance with ambient air quality levels to protect the public health and welfare. The enforcement provisions contained in N.J.A.C. 7:27A were promulgated and are proposed here for readoption with amendments in order to comply with the SIP requirements of the CAA as well as to provide an enforcement mechanism for the implementation of the State Air Pollution Control Program.

Penalties established and assessed by the Department pursuant to this chapter are in accordance with the State Air Pollution Control Act, N.J.S.A. 26:2C-1 et seq., specifically 26:2C-19. Pursuant to State law, penalties may be assessed in an amount not more than \$10,000 for a first violation, no more than \$25,000 for a second violation and not more than \$50,000 for the third and subsequent violations. If the violation is of a continuing nature, each day during which the violation continues or each day in which the violation is not paid in full, constitutes an additional, separate and distinct offense. See N.J.S.A. 26:2C-19d. Consequently, where a violation has occurred, a violator may be liable for a penalty as set forth by State law and it is possible that such a penalty may potentially exceed that which would be assessed by USEPA.

The Department believes that the penalties are necessary and reasonable in order to implement the SIP as provided by Federal law and to implement its air pollution control program generally. It is submitted that the Federal penalty structure is intended to be more general in nature and is not designed necessarily to fully address the various conditions that may exist in each state or region within the nation. The Federal regulatory scheme recognizes this and provides that the SIP requirements established by Federal law are minimum requirements; a SIP may be more stringent than Federal law. The State of New Jersey, which is densely populated and highly industrialized continues to have to deal with issues of noncompliance with certain

National Ambient Air Quality Standards. Readoption of the current penalty structure will continue to encourage compliance and discourage noncompliance with the state's air pollution control law and regulations and the Federal Clean Air Act requirements, including the State's Federally mandated emission reduction commitments set forth in the existing SIP.

The law is specific in providing for three ranges of penalties. The Department believes that the law provides for "up to" \$10,000, \$25,000 and \$50,000 for first, second and subsequent violations, so that it could develop a graduated penalty system with each penalty reasonably calculated to provide a meaningful deterrent. Working within the requirements of its enabling legislation, the Department has developed penalties which are consistent with statutory requirements and which are comparable to each violation or type of violation. Penalties have been established by the Department based not only upon the frequency of the offense, but also upon the nature of the violation. In some cases, the established penalty is as low as \$100.00; in others, because of the nature of the violations and possible risk to health and property, the need for detriment require that the amount be equal to the statutory limit.

The Department may also adjust a penalty in accordance with the following:

1. Compliance history of the violator;
2. The number of times and the frequency with which the violation has occurred;
3. The severity of the violation;
4. The nature, timing and effectiveness of any measures taken by the violator to mitigate the effects of the violations for which the penalty has been assessed;
5. The nature, timing and effectiveness of any measures taken to prevent future similar violation, and the extent to which such measures are in addition to those required under applicable State statute or rule;
6. Any other mitigating, extenuating or aggravating circumstances.

(See N.J.A.C. 7:27A-3.5(d) and (e).)

The Department may also treat certain violations as first violations (for which a lower penalty may apply) under certain circumstances. See N.J.A.C. 7:27A-3.5(f), (g), and (h).

It should be noted that no violator will be subject to both State and Federal penalty liability for the same violation.

Jobs Impact

The proposed readoption of N.J.A.C. 7:27A with amendments is not anticipated to have either a positive or negative impact upon jobs within the State. No facility will incur any costs unless it commits a violation that results in a penalty assessment.

Agriculture Industry Impact

In accordance with P.L. 1998, c. 48, an act amending the Right to Farm Act, the Department has reviewed this proposed readoption of N.J.A.C. 7:27A-3 with amendments and determined that it will have little or no impact upon the Agriculture Industry. The rules will have no effect upon any person unless there is a violation of any standard for which these rules establish penalties.

Upon review of the rules and the standards and requirements for which penalties are established by this chapter, the Department has determined that the only agriculturally related activity which may come under the purview of any such standards are those applicable to open burning. (See N.J.A.C. 7:27-2.) Therefore, anyone engaged in an agricultural activity who has

Draft Date: 08/09/04

obtained an open burning permit may incur penalty liability if he or she violates the terms and conditions of that permit or who performs open burning without the required permit.

Regulatory Flexibility Analysis

In accordance with the New Jersey Regulatory Flexibility Act, N.J.S.A. 52:14B-16 et seq., small businesses are defined as those which are independently owned and operated, not dominant in their field and which employ fewer than 100 full time employees. The establishment of grace periods will allow a person responsible for a violation to avoid penalties if the violation is corrected within the time provided, and therefore increase the regulatory flexibility of N.J.A.C. 7:27A. It is, therefore, anticipated that the rule will encourage violators to achieve compliance in a timely fashion. The proposed new rule will not, however, impose any additional compliance requirements upon the regulated community over what currently exist. In the event that a person responsible for such a violation elects not to comply with the grace period conditions, the Department will pursue the enforcement action in accordance with its current enforcement procedures.

Smart Growth Impact

Executive Order No. 4 (2002) requires State agencies which adopt, amend or repeal any rule adopted pursuant to Section 4(a) of the Administrative Procedure Act, to describe the impact of the proposed rule on the achievement of smart growth and implementation of the New Jersey State Development and Redevelopment Plan (State Plan). The Department has evaluated this rulemaking to determine the nature and extent of the proposed rules' impact on smart growth and

the implementation of the State Plan. The proposed rules do not involve land use policies or infrastructure development and therefore do not impact the achievement of smart growth.

Full text of the proposal follows (additions indicated in boldface **thus**; deletions indicated in brackets [thus]):

Subchapter 3. Civil Administrative Penalties and Requests for Adjudicatory Hearings

7:27A-3.2 Definitions

The following words and terms, when used in this subchapter, have the following meanings unless the context clearly indicates otherwise. Unless otherwise specified below, all words and terms are as defined in N.J.S.A. 26:2C-2 and in N.J.A.C. 7:27.

...

"Grace period" means a period of time during which a person can achieve compliance with a minor violation where the Department will not impose a penalty for that violation in accordance with N.J.S.A. 13:1D-125 et seq., commonly known as the Grace Period Law, and as further set forth in section N.J.A.C 7:27A-3.10(q).

...

7:27A-3.9 Civil administrative penalty for failure to provide information or test data or to maintain a permanent record of information or test data

(a)-(b) (No Change)

(c) Except as provided in N.J.A.C. 7:27A-3.10, the amount of the civil administrative penalty for offenses described in this section shall be as follows:

1. For the nonsubmittal of or the failure to maintain records of any smoke, opacity or emission data:

	<u>Grace Period Days</u>
<u>Nonsubmittal of records</u>	<u>30</u>
<u>Failure to Maintain Records</u>	<u>30</u>

- i. \$2,000 for the first offense;
- ii. \$4,000 for the second offense;
- iii. \$10,000 for the third offense; and
- iv. \$30,000 for the fourth and each subsequent offense.

2. For the nonsubmittal of or the failure to maintain records of any stack or test data not included in (c)1 above:

	<u>Grace Period Days</u>
<u>Nonsubmittal of records</u>	<u>30</u>
<u>Failure to Maintain Records</u>	<u>30</u>

- i. \$1,000 for the first offense;
- ii. \$2,000 for the second offense;
- iii. \$5,000 for the third offense; and
- iv. \$15,000 for the fourth and each subsequent offense.

3. For the nonsubmittal of or the failure to maintain any records or information not included in (c)1 or 2 above:

	<u>Grace Period Days</u>
<u>Nonsubmittal of records</u>	<u>30</u>
<u>Failure to Maintain Records</u>	<u>30</u>

- i. \$500 for the first offense;
- ii. \$1,000 for the second offense;
- iii. \$2,500 for the third offense; and
- iv. \$7,500 for the fourth and each subsequent offense.

(d) (No Change)

7:27A-3.10 Civil administrative penalties for violation of rules adopted pursuant to the Act
(a)-(l) (No Change)

(m) The violations of N.J.A.C. 7:27, **the grace period if applicable**, and the civil administrative penalty amounts for each violation are as set forth in the following Civil Administrative Penalty Schedule. The numbers of the following subsections correspond to the numbers of the corresponding subchapter in N.J.A.C. 7:27. The rule summaries for the requirements set forth in the Civil Administrative Penalty Schedule in this subsection are provided for informational purposes only and have no legal effect.

CIVIL ADMINISTRATIVE PENALTY SCHEDULE

1. (Reserved)
2. The violations of N.J.A.C. 7:27-2, Control and Prohibition of Open Burning, and the civil administrative penalty amounts for each violation are as set forth in the following table:

Citation	Class	Grace Period (days)	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-2.2	Small scale (up to 55 gallon drum or equivalent)	<u>0</u>	\$300	\$600	\$1,500	\$4,500
	Large Scale	<u>0</u>	\$2,000	\$4,000	\$10,000	\$30,000
	Material containing pesticides, dangerous materials and solvents	<u>0</u>	\$5,000	\$10,000	\$25,000	\$50,000
N.J.A.C. 7:27-2.3(a)	Small scale (up to 55 gallon drum or equivalent)	<u>0</u>	\$200	\$400	\$1,000	\$3,000
	Large scale	<u>0</u>	\$2,000	\$4,000	\$10,000	\$30,000
	Material containing pesticides, dangerous materials and solvents	<u>0</u>	\$5,000	\$10,000	\$25,000	\$50,000
N.J.A.C. 7:27-2.3(b)	Residential	<u>0</u>	\$100	\$200	\$500	\$1,500
	Commercial	<u>0</u>	\$1,000	\$2,000	\$5,000	\$15,000
N.J.A.C. 7:27-2.3(c)	Residential	<u>0</u>	\$100	\$200	\$500	\$1,500

Citation	Class	Grace Period (days)	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
	Commercial	<u>0</u>	\$1,000	\$2,000	\$5,000	\$15,000
N.J.A.C. 7:27-2.4	Not acting in accordance with permit	<u>0</u>	\$1,000	\$2,000	\$5,000	\$15,000

3. The violations of N.J.A.C. 7:27-3, Control and Prohibition of Smoke from Combustion of Fuel, and the civil administrative penalty amounts for each violation, per source, are as set forth in the following table:

Citation	Class	Grace Period (days)	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-3.2	Boiler capacity less than 200 x 10 ⁶ BTU	<u>0</u>	\$300 ¹	\$600 ¹	\$1,500 ¹	\$4,500 ¹
	Boiler capacity 200 x 10 ⁶ BTU or greater	<u>0</u>	\$1,000 ²	\$2,000 ²	\$5,000 ²	\$15,000 ²
N.J.A.C. 7:27-3.3	Marine Installations	<u>0</u>	\$400 ²	\$800 ²	\$2,000 ²	\$6,000 ²
N.J.A.C. 7:27-3.4	Mobile Sources	<u>0</u>	\$400	\$800	\$2,000	\$6,000
N.J.A.C. 7:27-3.5	Stationary Engines	<u>0</u>	\$400 ²	\$800 ²	\$2,000 ²	\$6,000 ²
N.J.A.C. 7:27-3.6	Facilities and Equipment	<u>30</u>	\$1,000	\$2,000	\$5,000	\$15,000
	Records	<u>30</u>	\$400	\$800	\$2,000	\$6,000
¹ Double Penalty If Over One Ringlemann or 20% Opacity ² Double Penalty If Over Two Ringlemann or 40% Opacity						

4. The violations of N.J.A.C. 7:27-4, Control and Prohibition of Particles from the Combustion of Fuel, and the civil administrative penalty amounts for each violation, per source, are as set forth in the following table:

Citation	Grace Period (days)	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-4.2					
CLASS					
Maximum Actual Emissions					
For less than 10 pounds per hour:					
1. Less than 25 percent over the allowable	<u>0</u>	\$2,000 ³	\$4,000 ³	\$10,000 ³	\$30,000 ³

standard						
2. From 25 through 50 percent over the allowable standard		<u>0</u>	\$4,000 ³	\$8,000 ³	\$20,000 ³	\$50,000 ³
3. Greater than 50 percent over the allowable standard		<u>0</u>	\$8,000 ³	\$16,000 ³	\$40,000 ³	\$50,000 ³
From 10 pounds through 22.8 pounds per hour:						
1. Less than 25 percent over the allowable standard		<u>0</u>	\$6,000 ³	\$12,000 ³	\$30,000 ³	\$50,000 ³
2. From 25 through 50 percent over the allowable standard		<u>0</u>	\$8,000 ³	\$16,000 ³	\$40,000 ³	\$50,000 ³
3. Greater than 50 percent over the allowable standard		<u>0</u>	\$10,000 ³	\$20,000 ³	\$50,000 ³	\$50,000 ³
For greater than 22.8 pounds per hour:						
1. Less than 25 percent over the allowable standard		<u>0</u>	\$8,000 ³	\$16,000 ³	\$40,000 ³	\$50,000 ³
2. From 25 through 50 percent over the allowable standard		<u>0</u>	\$10,000 ³	\$20,000 ³	\$50,000 ³	\$50,000 ³
3. Greater than 50 percent over the allowable standard		<u>0</u>	\$10,000 ³	\$20,000 ³	\$50,000 ³	\$50,000 ³
Citation	Class	<u>Grace Period (days)</u>	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-4.4	Sampling & Testing Facilities	<u>30</u>	\$2,000	\$4,000	\$10,000	\$30,000
	Operation	<u>30</u>	\$2,000	\$4,000	\$10,000	\$30,000
³ Revoke Certificate to Operate Under N.J.A.C. 7:27-8 (if applicable)						

5. The violations of N.J.A.C. 7:27-5, Prohibition of Air Pollution, and the civil administrative penalty amounts for each violation, per source, are as set forth in the following tables:

Citation	<u>Grace Period (days)</u>	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-5.2(a), the emission of air contaminants in such quantities and duration as are, or tend to be, injurious to human health or welfare, animal or plant life or property					
	<u>0</u>				

Citation	Grace Period (days)	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
Maximum Penalty Per Violation		\$10,000 ⁷	\$25,000 ⁷	\$50,000 ⁷	\$50,000 ⁷
The maximum penalty may be reduced by applying the following factors:					
(1) Remedial Measures Taken:					
(A) Immediate implementation of measures to effectively mitigate the effects of the violation:	15% Reduction from the maximum penalty				
(B) Implementation of measures that can reasonably be expected to prevent a recurrence of the same type of violation					
1. Full implementation	20% Reduction from the maximum penalty				
2. Partial implementation	10% Reduction from the maximum penalty				
(2) Magnitude of Problem					
(A) Population Affected					
Less than three complainants:	20% Reduction from the maximum penalty				
Three to five complainants:	15% Reduction from the maximum penalty				
Six to 10 complainants:	5% Reduction from the maximum penalty				
Greater than 10 complainants:	0% Reduction from the maximum penalty				
(B) Nature of Air Contaminant ⁹					
Particulates & other air contaminants:	15% Reduction from the maximum penalty				
VOC, NO _x or other criteria pollutant:	5% Reduction from the maximum penalty				
EHS, TXS or NESHAP:	0% Reduction from the maximum penalty				
(C) Amount of Air Contaminant Emitted in Any One Hour					
Less than 22.8 pounds:	15% Reduction from the maximum penalty				
22.8 pounds or greater:	0% Reduction from the maximum penalty				
(D) Area Covered (Air contaminant)					

Citation	<u>Grace Period (days)</u>	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
Less than 1/2 square mile:	15% Reduction from the maximum penalty				
1/2 square mile or greater:	0% Reduction from the maximum penalty				
(E) Off-site Property Damage					
No:	15% Reduction from the maximum penalty				
Yes:	0% Reduction from the maximum penalty				
⁷ For instance, for the first offense, if the violator takes remedial measures to mitigate the effects of the violation, the Department may reduce \$1,500 (15%) from the maximum penalty. Further, if the violator takes measures that can reasonably be expected to prevent a recurrence of the same type of violation, the Department may reduce an additional \$2,000 (20%) from the maximum penalty. Further, if there are less than three complainants related to the violation the Department may reduce an additional \$2,000 (20%) from the maximum penalty. Further, if an air contaminant emitted is not a VOC, NO _x , criteria pollutant, EHS, TXS, or NESHAP the Department may reduce an additional \$1,500 (15%) from the maximum penalty. Further, if the air contaminant emitted is less than 22.8 pounds in any one hour to the atmosphere the Department may reduce an additional \$1,500 (15%) from the maximum penalty. Further, if the air contaminant emitted into the atmosphere covers an area of less than 1/2 square mile, the Department may reduce an additional \$1,500 (15%) from the maximum penalty. Further, if there is no off-site property damage from the air contaminant the Department may reduce an additional \$1,500 (15%) from the maximum penalty. Summing the total penalty reduction percentages results in a total reduction of 115%. However, an assessed penalty may not be reduced by more than 95% of the maximum penalty; therefore, the maximum reduction for the first offense penalty of \$10,000 would be \$9,500 resulting in an assessed penalty of \$500.00.					
⁹ VOC (N.J.A.C. 7:27-16) EHS (N.J.A.C. 7:31-1) NO _x (N.J.A.C. 7:27-19) Criteria pollutant (N.J.A.C. 7:27-13) TXS (N.J.A.C. 7:27-17) NESHAP (40 CFR 61)					

Citation	<u>Grace Period (days)</u>	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-5.2(a), the emission of air contaminants in such quantities and duration as would unreasonably interfere with the enjoyment of life or property and which are not, or do not tend to be, injurious to health or welfare, animal or plant life or property					
Base Penalty per Violation	<u>0</u>	\$1,000 ¹	\$2,000 ¹	\$5,000 ¹	\$15,000 ¹
i. The base penalty may be reduced or increased by applying the following factors, as applicable. The civil administrative penalty for each violation is calculated by summing the					

base penalty and the increase or decrease from the base penalty for each of the applicable factors in i(1) through (4) below.	
(1) Remedial Measures Taken	
(A) Immediate implementation of measures to effectively mitigate the effects of the violation:	15% Reduction from the base penalty
(B) [1] Implementation of measures that can reasonably be expected to prevent a recurrence of the same type of violation	
1. Full implementation	20% Reduction from the base penalty
2. Partial implementation	10% Reduction from the base penalty
(2) Population Affected	
(A) Three to five complainants:	10% increase to the base penalty
(B) Six to 10 complainants:	15% increase to the base penalty
(C) Greater than 10 complainants:	20% increase to the base penalty
(3) Nature of Air Contaminant ²	
(A) VOC, NO _x or other criteria pollutant:	15% increase to the base penalty
(B) EHS, TXS or NESHAP:	20% increase to the base penalty
(4) Compliance History	
(A) Upon a showing by a violator within 14 calendar days of receipt of the notice of violation from the Department that, at the time of the pending violation:	
1. The violator was in full compliance with the terms and conditions of all Department permits and certificates related to the pending violation:	
2. The violator was in full compliance with all air pollution control permits and certificates for the facility where the violation is pending, except for the violation of N.J.A.C. 7:27-5.2(a) and N.J.A.C. 7:27-8.3(j); and	
3. The pending violation is the first violation of N.J.A.C. 7:27-5.2(a) for the facility within the five calendar years immediately preceding the date of the pending violation:	
¹ For instance, for the first offense, if the violator takes immediate remedial measures to mitigate the violation, the Department may reduce \$150.00 (15%) from the base penalty. Further, if the violator takes measures that can reasonably be expected to prevent a recurrence of the same type of violation, the Department may reduce an additional \$200.00 (20%) from the base penalty. Further, if there are less than three complainants related to the violation there is no increase to or reduction from the base penalty. Further, if an air contaminant emitted is not a VOC, AAQS, EHS, TXS, or NESHAP there is no increase to or reduction from the base penalty. Further, if this	

is the first violation of N.J.A.C. 7:27-5.2(a) for the facility within five years immediately preceding the date of the pending violation and the violator can demonstrate that it was in full compliance with the terms and conditions in all Department permits and certificates related to the pending violation and with all air pollution control permits and certificates, the Department may reduce an additional \$500.00 (50%) from the base penalty. Therefore, the minimum assessed penalty for the first offense under this section would be \$150.00. In this example, all of the reductions were taken to the fullest extent to result in the minimum penalty.

- ² VOC (N.J.A.C. 7:27-16)
EHS (N.J.A.C. 7:31-1)
NO_x (N.J.A.C. 7:27-19)
Criteria pollutant (N.J.A.C. 7:27-13)
TXS (N.J.A.C. 7:27-17)
NESHAP (40 CFR 61)

6. The violations of N.J.A.C. 7:27-6, Control and Prohibition of Particles from Manufacturing Processes, and the civil administrative penalty amounts for each violation, per source, are as set forth in the following table:

Citation	<u>Grace Period (days)</u>	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-6.2(a)					
CLASS					
Maximum Actual Emissions					
For less than 10 pounds per hour:					
1. Less than 25 percent over the allowable standard	<u>0</u>	\$2,000 ³	\$4,000 ³	\$10,000 ³	\$30,000 ³

28. (Reserved)

29. (Reserved)

30. (Reserved)

31. The violations of N.J.A.C. 7:27-31, and the civil administrative penalty amounts for each violation, are as set forth as follows:

- i. The penalty amounts for violation of N.J.A.C. 7:27-31.3(i), which requires a minimum number of allowances to be held in a budget source's compliance account as of the allowance transfer deadline, are set forth in the following table, directly dependent on the number of tons of shortfall (each ton of excess emissions is a separate violation):

<u>Allowance Transfer Deadline</u>	<u>Grace Period Days</u>
	<u>0</u>

Amount of Shortfall (in tons)	Civil Administrative Penalty Amounts (per ton)
1-10	\$ 2,000
11-20	\$ 4,000
21-50	\$10,000
51-100	\$30,000
over 100	\$50,000

- ii. The base penalty amount as calculated in (m)31i above shall be limited by the statutory maximum penalty calculated as follows:

- (1) For first offense levels (see N.J.A.C. 7:27A-3.5(f) for an explanation of determining offense levels), the penalty shall not exceed \$10,000 per day for each day of violation within the control period (\$10,000 per day x 153 days = \$1,530,000);
 - (2) For second offense levels (see N.J.A.C. 7:27A-3.5(f) for an explanation of determining offense levels), the penalty shall not exceed \$25,000 per day for each day of violation within the control period (\$25,000 per day x 153 days = \$3,825,000);
 - (3) For third and subsequent offense levels (see N.J.A.C. 7:27A-3.5(f) for an explanation of determining offense levels), the penalty shall not exceed \$50,000 per day for each day of violation within the control period (\$50,000 per day x 153 days = \$7,650,000); and
 - (4) If the authorized account representative of the budget source can prove that the number of days of violation in the control period is less than 153 days, then the maximum penalty as calculated in (m)31ii(1) through (3) above shall be adjusted accordingly.
- iii. The violations of other provisions at N.J.A.C. 7:27-31, and the civil administrative penalty amounts for each violation, are as set forth in the following table:

- (n) The Department shall determine the amount of civil administrative penalty for violations of N.J.A.C. 7:27-8 and 7:27-22 as follows: for violations detected by continuous monitoring systems in accordance with (n)1 below; for continuous monitoring systems not installed, out of service or out of control in accordance with (n)2 below; and for violations of continuous monitoring systems recordkeeping and reporting requirements in accordance with (n)3 below. The rule summaries for the requirements set forth in the Civil Administrative Penalty Schedule in this subsection are provided for informational purposes only and have no legal effect.

1. The Department shall determine the amount of civil administrative penalty for violations of N.J.A.C. 7:27-8.3(e) and 7:27-22.3(e) as indicated by continuous monitoring systems on the basis of the severity level, duration of the offense and the size or nature of the source operation associated with the violation as follows:
 - i. Table 1 of this section shall be used to determine the level of offense, based on the percentage or amount of differential from the standard or allowable set forth in the Preconstruction Permit or Operating Certificate issued pursuant to N.J.A.C. 7:27-8 or Operating Permit issued pursuant to N.J.A.C. 7:27-22.
 - ii. Tables 2A or 2B of this section shall be used to determine the amount of the base penalty. The level of offense determined from Table 1 is used in conjunction with either Table 2A (for any major source operation) or Table 2B (for any minor source operation) as defined in the corresponding footnotes below Tables 2A and 2B.
 - iii. Table 3 shall be used to determine a multiplier which shall be applied to the base penalty from either Table 2A or 2B. The multipliers included in Table 3 each correspond to the duration of the offense or the length of the averaging time provided in the Preconstruction Permit or Operating Certificate issued pursuant to N.J.A.C. 7:27-8 or Operating Permit issued pursuant to N.J.A.C. 7:27-22. The base penalty determined from Table 2A or 2B is multiplied by the appropriate Table 3 multiplier to determine the penalty amount of the offense.

CONTINUOUS MONITORING SYSTEMS ⁷

TABLE 1

	CONTINUOUS EMISSION MONITORS			CONTINUOUS PROCESS MONITORS		
LEVEL OF OFFENSE	AIR CONTAMINANTS (% above allowable emission rate or concentration)	OPACITY	OXYGEN (%)	pH	TEMPERATURE degrees Rankine (°F +460)	OTHER MINIMUM OR MAXIMUM SPECIFICATIONS ²
LEVEL I	Greater than 0% up to and including 25%	Greater than the standard up to and including 20%	75% to less than 100% of the minimum oxygen concentration	pH differential of less than 2	Any deviation greater than 0% up to and including 5% of the standard	Any deviation greater than 0% up to and including 25% of the standard
LEVEL II	Greater than 25% up to and including 50%	Greater than 20% up to and including 40%	50% to less than 75% of the minimum oxygen concentration	pH differential of 2 through 5	Any deviation greater than 5% up to and including 15% of the standard	Any deviation greater than 25% up to and including 50% of the standard
LEVEL III	Greater than 50%	Greater than 40%	Less than 50% of the minimum oxygen concentration	pH differential of greater than 5	Any deviation greater than 15% of the standard	Any deviation greater than 50% of the standard

¹ If applicable, use Level of Offense established in the Preconstruction Permit or Operating Certificate issued pursuant to N.J.A.C. 7:27-8 or Operating Permit issued pursuant to N.J.A.C. 7:27-22, if different from Table 1.

² e.g., Pressure Drop, Flow Rate, Oxidation Reduction Potential, etc.

1. Major Source Operation ³						
Each day through day five ⁵		<u>0</u>	\$200 ⁶	\$400 ⁶	\$1,000 ⁶	\$3,000 ⁶
Day six and each subsequent day thereafter ⁵		<u>0</u>	\$500 ⁶	\$1,000 ⁶	\$2,500 ⁶	\$7,500 ⁶
2. Minor Source Operation ⁴						
Each day through day five ⁵		<u>0</u>	\$100 ⁶	\$200 ⁶	\$500 ⁶	\$1,500 ⁶
Day six and each subsequent day thereafter ⁵		<u>0</u>	\$250 ⁶	\$500 ⁶	\$1,250 ⁶	\$3,750 ⁶

3. The violations of N.J.A.C. 7:27-8.3(e) and N.J.A.C. 7:27-22.3(e) for continuous monitoring systems recordkeeping and reporting requirements and the civil administrative penalty amounts for each violation are set forth in the following Table:

Citation	Rule Summary	Grace Period (days)	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent Offense
N.J.A.C. 7:27-8.3(e) and N.J.A.C. 7:27-22.3(e)	Comply with Preconstruction Permit, Certificate and Operating Certificate Requirements for Continuous Monitoring Systems					
Class:						
1. Keep Records ⁵		<u>0</u>	\$5,00 ⁶	\$10,00 ⁶	\$2,500 ⁶	\$7,500 ⁶
2. Submit [Records] Reports ⁵		<u>30</u>	\$300 ⁶	\$600 ⁶	\$1,500 ⁶	\$4,500 ⁶

- ³ Any source operation with estimated potential emissions without controls of greater than 22.8 pounds per hour, or greater than 5.7 pounds per hour for VOC and NO_x, or air contaminants regulated pursuant to NSPS, NESHAP, PSD, EOR, TXS and HAP (Table B) based on Preconstruction Permit or Certificate issued pursuant to N.J.A.C. 7:27-8 or Operating Permit issued pursuant to N.J.A.C. 7:22.
- ⁴ Any source operation with estimated potential emissions without controls of 22.8 pounds per hour or less, or 5.7 pounds per hour or less for VOC and NO_x, based on a Preconstruction Permit or Certificate issued pursuant to N.J.A.C. 7:27-8 or an Operating Permit issued pursuant to N.J.A.C. 7:27-22.
- ⁵ Number of days after subtracting downtime allowance pursuant to N.J.A.C. 7:27-1, or a Preconstruction Permit or Certificate issued pursuant to N.J.A.C. 7:27-8 or an Operating Permit issued to N.J.A.C. 7:27-22.
- ⁶ Per continuous monitor.
- ⁷ For instance, a Preconstruction Permit and Operating Certificate issued pursuant to N.J.A.C. 7:27-8 or an Operating Permit issued pursuant to N.J.A.C. 7:27-22 requires that for any 1-hour period, the average concentration of nitrogen oxides (NO_x) in the stack gas shall not exceed 300 parts per million by volume as determined by continuous monitoring. A violator emitted NO_x from a major source operation at an hourly averaged concentration rate of 350 parts per million by volume. Using Table 1, determine the level of offense for the air contaminant (NO_x). Because the violator emitted NO_x at a concentration less than 25% above the allowable, the Level of Offense is Level I. The source operation is considered major because it emits NO_x in excess of 5.7 pounds per hour. Using Table 2A for a major source operation, determine the base penalty that corresponds to Level I. The base penalty for a Level I offense for a major source operation is \$200. Using Table 3, determine the multiplier corresponding to a 1 hour averaging time. Multiply \$200 by 2, the multiplier from Table 3. The penalty for the offense is \$400.

(o)-(p) (No Change)

(q) A person responsible for any minor violations listed in the tables at N.J.A.C. 7:27A-3.9(c), N.J.A.C. 7:27A-3.10(m) and N.J.A.C. 7:27A-3.10(n) and as indicated below shall achieve compliance within 30 days of notification of a minor violation in accordance with subsection 5 below.

1. Each violation where the grace period is 30, and where the requirements listed in subsection 4 below are satisfied, will be considered a minor violation and the person responsible will be allowed a 30 day grace period.

2. Each violation where the grace period is 0, or where the requirements listed in subsection 4 below are not satisfied, will be considered a non-minor violation and the person responsible will not be allowed a grace period.

3. For each violation where the grace period designation is <*>, the applicability of a grace period will be as follows:

i. For any violation that resulted in an emission increase, a release of a contaminant not listed in a permit, a release of an air contaminant above a permit allowable or a statutory limit in any State or Federal regulation, or was a result of a malfunction of a piece of equipment or control device that may have resulted in an emission increase, or where the requirements listed in subsection 4 below are not satisfied, the violation will be considered a non-minor violation and will not be allowed a grace period.

ii. For any violation not described in 3i above, and where the requirements listed in subsection 4 below are satisfied, the violation will be considered a minor violation and will be allowed a grace period of 30 days, except that any violation of a Federal requirement may not be allowed a grace period.

4. To be designated a minor violation the following requirements must be satisfied:

- i. The violation is not the result of the purposeful, knowing, reckless or criminally negligent conduct of the person responsible for the violation;
- ii. The activity or condition constituting the violation has existed for less than 12 months prior to the date of discovery by the Department or local government agency;
- iii. The person responsible for the violation has not been identified in a previous enforcement action by the Department or a local government agency as responsible for a violation of the same requirement of the same permit within the preceding 12 month period;
- iv. In the case of a violation that does not involve a permit, the person responsible for the violation has not been notified in a previous enforcement action by the Department or a local government agency as responsible for the same or a substantially similar violation at the same facility within the preceding 12-month period; and
- v. In the case of any violation, the person responsible for the violation has not been identified by the Department or a local government agency as responsible for the same or substantially similar violations at any time that reasonably indicate a pattern of illegal conduct and not isolated incidents on the part of the person responsible;

5. Where the Department or a local government agency discovers a violation that is designated as a minor violation in accordance with (q)1, 2, and 3 above,

it shall issue a notice of violation to the person responsible for the minor violation which:

- i. Identifies the condition or activity that constitutes the violation and the specific statutory provision or other requirement violated; and
- ii. Notifies the person responsible for the violation that a penalty may be imposed unless compliance has been achieved within the time period provided for in the notice of violation.

6. If the person responsible for a minor violation corrects that violation and demonstrates, in accordance with subsection 7 below, that compliance has been achieved within the time period specified in the notice of violation issued pursuant to this Chapter, the Department or a local government agency shall not seek penalties for the violation. In addition, if compliance has been demonstrated to the Department's satisfaction, the minor violation will not be considered an offense as defined in this Chapter.

7. Any person responsible for a violation shall be required to submit to the Department or a local government agency written information, certified in accordance with N.J.A.C. 7:27-1.39, and signed by the responsible official, as defined at N.J.A.C. 7:27-1.4, detailing the corrective action taken or compliance achieved, and shall do so within the prescribed compliance time period provided in the notice of violation issued pursuant to this Chapter.

8. If the person responsible for a violation requires additional time to achieve compliance beyond the time period specified in the notice of violation, the person responsible may request an extension to the time period specified in the notice of violation. Such request must be in writing and include the anticipated length of the delay, the precise cause or causes of the delay, and any measures taken or to be taken to minimize the delay, certified in accordance with N.J.A.C. 7:27-1.39, and received by the Department or the local government agency that issued the notice of violation at least one week before then end of the time period specified in the notice of violation. The Department may, at its discretion, grant a written extension to the time period specified in the notice of violation, but no more then 60 additional days extension may be granted.

9. If the person responsible for the violation fails to demonstrate to the Department or a local government agency that compliance has been achieved within the period of time specified in the notice of violation, the Department or a local government agency may, in accordance with the provisions of the Act or this chapter, impose a penalty that is retroactive to the date the notice of violation was first issued.

7:27A-3.11 Civil administrative penalty for violations of N.J.S.A. 26:2C-19(e)

- (a) The Department shall determine the amount of the civil administrative penalty for violations in this section on the basis of the provision violated and the frequency of the violation as follows:

Citation	<u>Grace Period (days)</u>	First Offense	Second Offense	Third Offense	Fourth and Each Subsequent
----------	------------------------------------	------------------	-------------------	------------------	----------------------------------

					Offense
N.J.S.A. 26:2C-19(e), failure to immediately notify the Department of release of air contaminants in a quantity or concentration which poses a potential threat to public health, welfare or the environment	<u>0</u>	\$2,000	\$4,000	\$10,000	\$30,000
N.J.S.A. 26:2C-19(e), failure to immediately notify the Department of release of air contaminants in a quantity or concentration which might reasonably result in citizen complaints, but which does not pose a potential threat to public health, welfare or the environment	<u>30</u>	\$200	\$400	\$1,000	\$3,000

Based on consultation with staff, I hereby certify that the above statements, including the Federal Standards Analysis addressing the requirements of Executive Order No. 27 (1994), permits the public to understand accurately and plainly the purposes and expected consequences of this proposed readoption with amendments. I hereby authorize this proposal.
